The above-referenced reports are available for your use in identifying SWOG approved Radiotherapy facilities and studies which utilize radiation therapy and may be found at the SWOG website (<http://swog.org/>). You must have a SWOG Roster ID number and password in order to access this information. To access the reports, log onto the website, click on "Clinical Trials" on the left-hand navigation bar then click on "RT Facilities List."

The Guide to Open SWOG Studies Involving Radiation Therapy provides a description of each active Group trial that includes radiation therapy as an aspect of treatment. This list identifies if rapid or final review is required and the SWOG Study Coordinator or other Group information for each study. This report is not intended to replace the protocol document, but should be used as a quick reference guide. Copies of individual protocols can be obtained through your affiliated member institution or via the SWOG website.

We have also included a listing of all SWOG-approved radiation therapy facilities by state that details radiation therapy facility identification numbers, contact personnel and the status of radiation therapy approval. This report also provides a listing of all radiation therapy facilities that have requested and received stereotactic radiosurgery facility final approval. Please review this report and contact the Operations Office by FAX at 210/614-0006 should your facility not be listed or should the information require updating. Please note that approval of a radiotherapy facility does not serve as approval of a physician as a Group member. A physician must be a member of the Group in order to receive registration privileges. Any physician desiring membership in the Group must contact the Principal Investigator at their member institution for nomination for membership.

If you have any difficulty obtaining this information from the website, a written request may be FAXed to the SWOG Operations Office at 210/614-0006 and a copy of these reports will be mailed to your institution.
