RE: Pharmaceutical Management Branch (PMB), CTEP Inventory Management System: **AURORA Update - Target Launch Date**

---

**MEMORANDUM**

**Pharmaceutical Management Branch (PMB), CTEP Inventory Management System: AURORA Update - Target Launch Date**

AURORA is the PMB's innovative and centralized agent inventory management system. The target launch date is **close of business January 6, 2023**.

The Agent Ordering, Document Access, and Primary Shipping Designee (PSD) Worksheet modules will be included in the initial release. Sites must perform these functions in AURORA after January 6, 2023 because the PMB's Online Agent Order Processing (OAOP) application will no longer be accessible. The Agent Accountability (eDARF) module will be launched shortly afterwards. The mandatory use date of the Agent Accountability module will be determined following release of the module. The expectation is that sites using paper DARFs will begin to transition as soon as the NCI eDARF module is available.

A training course on AURORA is available for self-enrollment in the Compliance, Learning, and SOP Solutions (CLASS) system. You can use [this link](#) to access and enroll in the course directly, or you can log in to [CLASS](#) and locate the NCI/CTEP AURORA Training course in the catalog and self-enroll from there. The training course is not mandatory but will be in the future (date TBD). For more information and to keep up to date, please visit the [PMB AURORA webpage](#).
