

**ATTENTION:** As part of our effort to move toward a totally electronic-based communication system, the Southwest Oncology Group will no longer provide facsimile transmission as backup for protocol status notices. Effective with the February 1, 2009 protocol distribution, all protocol-related communications will be via email push and/or web posting. Protocol-related email communications will continue to be directed to both the institutional Principal Investigator and to the institutional designated CRA.

Please contact the Membership Department in the Operations Office (210/450-8808) if you have any concern regarding email or web access to protocol communications.
