RE: Form Revisions

MEMORANDUM

As you know, when a protocol is activated, the forms to be used for that protocol are included as part of the protocol, and are referenced in the Data Submission Section. Forms go through many steps of review prior to being finalized, with the hope that they can remain constant throughout the life of the protocol. However, this is not always the case, and forms do need to be revised to correct errors, or collect additional data. We strive to make forms as accurate as possible the first time around, as revisions are both confusing for you and costly for us. Therefore, the revisions that *are* allowed are usually critical for accurate data entry, and so it is very important to use the latest version of each form.

About a year and a half ago, we sent out a memo informing you that we would no longer be able to accommodate old (replaced) versions of forms. We continue to send these back to the submitting institution as we get them. The purpose of this memo is to provide you with an updated list of forms that have been revised.

For example, **S9623** uses many forms first circulated on 4/1/1998. These forms were revised and re-circulated on 12/1/1998, and again on 12/15/1999. We can only accept the most recent version (12/15/1999). Others will be returned to the submitting institution with a letter stating the error, and directing you to the correct version of the form. A grace period of two months will be recognized, to give enough time for new forms to reach each institution and be incorporated.

If you are using an earlier version of one of the forms below, you can find the revised version in the protocol. You may download any of the forms below from the Southwest Oncology Group website at <http://swog.org>. Log in to the Members site, and select Clinical Trials, then Protocol Search from the menu. The forms can be found within their respective protocol documents.

We appreciate your understanding and cooperation. If you have any questions, please contact the Statistical Center at (206) 667-4623.
