

TrACER Study (S1415CD)

Trial Assessing CSF prescribing Effectiveness and Risk

Clinic Group Diagram

For ALL groups, the treating physician has the ultimate decision to prescribe or not prescribe primary prophylactic colony stimulating factors (PP-CSF). This study will follow the patient's natural history for one year regardless of PP-CSF use.

*National Comprehensive Cancer Network (NCCN) Guidelines – Summary

The National Comprehensive Cancer Network (NCCN) is an alliance of 27 of the world's leading cancer centers that have, over the past 20 years, developed sets of tools to improve the quality of cancer care. The NCCN guidelines are a comprehensive set of guidelines detailing cancer management and intervention recommendations based on the current best evidence available. The NCCN guidelines are developed and updated by 48 individual panels, comprising over 1,150 clinicians and oncology researchers from the 27 NCCN member institutions.
